

Traceability in urban transit with SAP Business One®.

The official distributor for Samsung in Kuwait, Andalus Trading Co turned to Procons4IT and SAP Business One to address security concerns in their operations. SAP Business One has since provided huge time savings and a clear audit trail for their processes.

“SAP Business One allows us to create a **controlled environment** in the workplace.”

Mr. Nibu Varghese - IT Head, Andalus Trading Company.

Before: Challenges and Opportunities

- Standard operating procedures were not in place and internal alignments were required.
- Data security was a concern as data could be altered at any point and the changes could not be traced.
- New software was required to modernize Andalus Trading Co's processes.

Why SAP and Procons 4IT

- Procons 4IT provided customization for the revenue processes as Andalus Trading Co first raises the sales order invoice and then completes delivery.
- Procons 4IT assisted with retail customization to allow sale on credit as a POS system was not present.
- SAP Business One was reasonable cost wise and HANA's analytics and dashboards were a major factor for the decision.

After: Value-Driven Results

- Andalus Trading Co has deployed its e-commerce website and are doing the back-end integration into SAP Business One.
- The approvals flow is now clearly defined and quickly expedited.
- A detailed system of checks and balances ensures accountability for data and reduces errors.
